PROFESSIONAL SUMMARY

AI/ML-focused Software Professional with hands-on experience in **Python, Artificial Intelligence, Machine Learning, Data Science, and Generative AI**. Experienced in **data preprocessing, analysis, model development, and evaluation**, with practical exposure to ML workflows, LLMs, NLP, and AI-driven solutions. Strong foundation in Python programming, SQL, data pipelines, and problem-solving, with current software development experience at Apollo Hospitals.

TECHNICAL SKILLS

Programming: Python, Java, C#

AI/ML: Machine Learning, Deep Learning, Artificial Intelligence, NLP, Generative AI, LLMs

Data Science: Data Analysis, Data Preprocessing, Data Cleaning, Feature Engineering, Data Visualization

ML Frameworks/Libraries: Scikit-Learn, PyTorch, Pandas, NumPy, Matplotlib, HuggingFace, LangChain

Backend: .NET, ASP.NET Core, FastAPI, REST APIs

Databases: SQL, MongoDB

Tools: Git, GitHub, Docker, Tableau, Excel

PROFESSIONAL EXPERIENCE

Trainee – Indraprastha Apollo Hospitals

Sep 2026 – Present

On-site Training, New Delhi, India

- Working on **Python and AI/ML-based solutions** for real-world applications and data-driven workflows.
- Applying **Python, SQL, and data processing** techniques while working on software and AI-related tasks.
- Working on software development using **C# and .NET** for application and backend development.

GEN AI Intern – The Codevamp Technologies, Bareilly

Nov 2025 – Apr 2026

- Worked on **Python-based Data Science and AI/ML projects** involving data cleaning, preprocessing, analysis, and model building.
- Worked with **Generative AI, LLMs, NLP, and LangChain** to develop intelligent AI solutions.

Summer Trainee – Python for Data Science, IIT Kanpur

2025

- Built a strong foundation in **Python programming, OOP, data structures, exception handling, and problem-solving**.
- Applied **Python for Data Science** using NumPy, Pandas, and Matplotlib for data analysis and visualization.

AI/ML PROJECTS

AI Fraud Detection System – [GitHub](#)

- Built a machine learning-based fraud detection system using **Python and Scikit-Learn** to identify fraudulent transactions.
- Processed and analyzed a **6.3M-record dataset**, applying data preprocessing and ML techniques for fraud classification.

RAG Voice Chatbot – [GitHub](#)

- Built a **RAG-based AI chatbot** using Python, HuggingFace embeddings, Gemini LLM, and FAISS for semantic document retrieval.
- Implemented document processing and retrieval workflows with **voice input support**.

Netflix Movie Data Analysis – [GitHub](#)

- Performed **data preprocessing, exploratory analysis, and visualization** on 9,000+ movie records using Python, Pandas, and NumPy.
- Created visualizations using Matplotlib and Seaborn to identify trends and patterns in movie data.

EDUCATION

B.Tech – Computer Science and Engineering, SRMS Engineering College, Bareilly

2022 – 2026

Senior Secondary (CBSE) – Police Modern School, Bareilly

2020
